Tejas Medade

"Passionate Architect & Designer Turned Developer"
Mumbai, Maharashtra, India

Summary

Greetings! I am Tejas Vilas Medade, a Java Full Stack Developer passionate about crafting efficient, scalable, and secure software solutions. With over 3 years of professional experience in Fullstack development and a strong foundation in architecture and design, I bring a unique perspective to the tech landscape.

I began my journey with a Bachelor's degree in Architecture from Amity University, Mumbai, where I honed my skills in problem-solving, innovation, and creative thinking. This foundation has been instrumental in shaping my ability to design and implement robust software systems.

In addition to my technical expertise, my earlier roles have equipped me with strong interpersonal and creative skills, enabling effective collaboration with cross-functional teams.

I thrive on solving complex challenges, integrating diverse skill sets, and driving innovation to deliver impactful results. Whether it's modernizing enterprise systems or building cutting-edge applications, I am committed to delivering excellence at every step.

Let's connect to explore opportunities for collaboration and innovation!

Experience

Mahindra Finance
Full Stack Engineer
June 2024 - Present (2 years)
Mumbai, Maharashtra, India

Modernized Legacy System: Transitioned legacy JSP-based applications to a modern microservices architecture with React (frontend) and Spring Boot (backend), improving scalability, performance, and user experience.

API Development & Integration: Designed and integrated RESTful APIs with secure data exchange, enabling seamless communication between frontend and backend services.

Database Management: Managed Oracle DB, including schema creation, complex data migrations, and stored procedure optimization for efficient data processing.

Financial Product Development: Contributed to an internal loan transaction system compliant with RBI guidelines, implementing secure financial calculations and algorithms.

Data Security & Threat Mitigation: Implemented robust data encryption mechanisms (RSA encryption, signature encoding) and mitigated vulnerabilities through SQL injection prevention, input sanitization, and JWT token authentication.

Deployment & Monitoring: Managed deployments with Tomcat and JBoss, optimized application performance, and implemented advanced logging for monitoring and threat analysis.

Rate Limiting: Developed rate limiters to prevent abuse and safeguard against denial-of-service attacks, enhancing system reliability and security.

Prospecta Software

Java Developer

February 2023 - June 2024 (1 year 5 months)

Gurugram, Haryana, India

Product: Master Data Online - Fuse

MDO is a versatile product ensuring data integrity and efficiency. It seamlessly integrates with SAP and Salesforce, empowering users to make informed decisions based on reliable data.

Skills Set:

Java, J2EE, Spring, Maven, Spring Batch, Spring Security, Excel Connect, Scala, Spring Boot, JBPM, KIE, Hibernate, Elasticsearch, RabbitMQ, SQL, Git, Jenkins, Liquibase, OpenSearch, gRPC, JWT, Angular 16, Tomcat, Red

Hat OpenShift, Microservices, Pod Management and Deployment, POM Configuration, Sonar, Verbose Security Fixes.

Role and Responsibilities:

Spearheaded end-to-end backend development, utilizing Java and Elasticsearch for real-time visualization, and dynamically generated database tables for flexibility.

Led the implementation of a mass upload feature, enhancing data management efficiency with validations, notifications, and detailed Excel reports.

Developed dynamic date and time functionalities in Angular to enhance user experience and data consistency.

Engineered time-based restrictions and one-time use email links, enhancing system reliability and security.

Designed lookup rules and custom scripts within Elasticsearch, optimizing data querying capabilities.

Pioneered a robust system for mass record validation, optimizing JVM memory utilization and enhancing system performance.

Transformed dashboard reports into PDF/PPT formats leveraging AWS infrastructure for automated delivery.

Crafted bespoke business rules and fail-safe mechanisms within microservices, fortifying system resilience.

Led development and deployment of a high-capacity data management system, streamlining data handling.

Proficient in API development using gRPCs, RestTemplates, ensuring seamless automation and tailored solutions.

Masai

Full Stack Web Developer

February 2022 - February 2023 (1 year 1 month)

Bangalore Urban, Karnataka, India

Completed a professional internship facilitated by Masai School, providing an immersive learning opportunity to gain hands-on experience in Full Stack Web Development. The program emphasized industry-aligned training, practical application, and problem-solving in real-world scenarios.

Engaged in the design, implementation, and deployment of Java-based backend solutions, focusing on RESTful APIs, database integration, and enterprise application development. Acquired extensive experience with technologies and frameworks such as Spring Boot, Hibernate, Servlets, JSP, and Maven.

Enhanced expertise in Data Structures and Algorithms through rigorous training and practical coding exercises, fostering efficient and optimized problem-solving skills.

Collaborated in team-based projects, simulating professional development environments, and adhering to software engineering best practices. Developed robust technical and interpersonal skills essential for success in modern software development roles.

This internship provided a strong foundation in Full Stack Development and equipped me with the tools to build scalable, maintainable, and efficient software solutions.

Revenant Esports

Freelance Web Designer

2020 - 2021 (1 year)

United States

Revenant Esports is home to top-notch talent competing in various PC & Mobile Esports Titles. Founded in 2021, Revenant has swiftly emerged as the premier Esports Team in South Asia, consistently making its mark on the global stage.

Roles and Responsibilities:

Collaborative Design: Worked closely with team members, including marketing strategists, creative directors, and web designers, to develop impactful digital and print deliverables. Projects included digital ads, landing pages, social media graphics, newsletters, and sales decks.

Web Design and Development: Designed and maintained responsive and user-friendly landing pages and microsites, ensuring seamless integration of design elements with functionality. Collaborated with developers to optimize web assets and ensure design consistency across platforms.

Design Optimization: Produced high-quality, visually appealing designs that aligned with brand guidelines. Conducted A/B testing to assess the performance of digital assets and implemented improvements based on analytics insights.

Brand Development: Contributed to the evolution of the brand identity by designing logos, typography, and visual style guides, ensuring consistent application across all platforms.

Client Consultation: Worked directly with stakeholders to understand project requirements, recommend appropriate graphic and web design solutions, and deliver tailored creative assets.

UI/UX Design: Applied user-centered design principles to create intuitive user interfaces and enhance the user experience of websites and mobile applications. Developed wireframes, prototypes, and visual mockups for review and feedback.

Maintenance and Updates: Monitored and updated web content regularly, troubleshooting and resolving design inconsistencies or functionality issues as needed.

Writer Corporation

Human Resources Assistant

2017 - 2018 (1 year)

Mumbai, Maharashtra, India

Writer Information Management Services, a division of Writer Corporation since 1987, is India's largest Information Management Company. Specializing in secure data retention and organization, we offer comprehensive solutions from Enterprise Content Management to Digital Solutions. Trusted by businesses across Asia for our reliability and innovation.

Roles and Responsibilities:

Provided comprehensive assistance with internal and external human resource inquiries and requests.

Maintained digital and electronic employee files, and facilitated the issuance of employment contracts.

Managed HR management team calendars and coordinated training sessions and seminars.

Conducted orientations and ensured accurate record-keeping for new hires.

Generated and submitted reports on various HR activities.

Processed payroll and resolved any associated errors efficiently.

Completed HR documents and ensured compliance with policies and regulations.

Kept abreast of the latest HR trends and best practices to support organizational growth and effectiveness.

Skill Set:

HR Administration, Employee Relations, Recruitment Support, Payroll Processing, Record Keeping, Training Coordination, Report Generation, Compliance Management, Communication Skills, Organizational Skills

Education

Amity University Mumbai

Bachelor of Architecture, Architecture · (January 2016 - May 2022)

St. Xavier's College, Mumbai

High School Diploma, Science · (August 2014 - August 2016)
